## Instructions for accessing your personal hourly water use data

S&Tmwc has upgraded our point-of-sale water meters to a new advanced metering technology with cellular data transmission that records water flow data in 15 minute increments to a web based data analysis system. We hope that having access to high quality water use data can help us all gain a better understanding of how we are using water and also help us to save money on water bills by minimizing unnecessary leakage flow at our individual properties.

The new web based data system is called,  EyeOnWater

Each account will only be allowed to have ONE login. Therefore, it may be necessary to share your single login credentials with family members and/or renters.

Here are instructions for creating two types of logins to the EyeOnWater data system; (A) login from a computer, and (B) Login from a smart phone. If you want to have both a computer login and a smart phone login, you will need to use a different email address for these logins.

(A) Here are the steps for creating an EyeOnWater account for viewing your water use data **FROM A COMPUTER:**

- 1) go to the website at: [www.EyeOnWater/Signup](http://www.EyeOnWater/Signup)
- 2) Follow the instructions to create an EyeOnWater Account
- 3) Hint: Your S&T Account Number (your account number appears on your water bill)

(B) Here are the steps for accessing your EyeOnWater Account **FROM A SMART PHONE:**

- 1) Go to the website at: [www.EyeOnWater/Signup](http://www.EyeOnWater/Signup)
- 2) Click on the mobile phone application link for your type of Smart Phone and complete the

*Here is a link to a YouTube tutorial that explains how to create a login and then how to use the EyeOnWater system to monitor your water use and how to set up leak alerts.*
